The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katayama (2005/0125549) states in paragraph [0039] "One embodiment of the information processing apparatus according to the present invention is characterized in that the data for determination is a probability value as a rule deciding condition descriptor included in a data processing request, and the rule decision processing unit is configured to execute random number generation processing, and to execute determining processing for determining whether or not the processing according to a processing request is to be executed according to a result of comparison between a generated random number and the probability value" and in paragraph [0060] "and determines whether or not the processing according to the processing request is to be executed according to a result of comparison between a generated random number and the probability value". In other words, Katayama teaches deciding whether or not to do a data processing request in a distributed data processor based upon a comparison of a locally generated random number with a probability value. Nonnemacher *et al.* teaches, in a multicast communication, a probabilistic feedback of NAK signals from all receivers based on timers.

Claims 1-55 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited references teach or fairly suggest comparing a locally generated random value with a value transmitted from a server (termed "an acknowledgement value" in applicants' claims) and then using the result to decide whether or not to send an ACK (or NACK) (termed "an acknowledgement signal" in applicants' claims) as is recited in applicants' independent claims 1, 9, 17, 25, 33, 37, 41, 45 and 49. Further, the "computer-readable media" recited in claims 25-32 and 45-48, by the examples given in the specification, do not include non-statutory subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
